

Winchester 12g Model 21 Hammerless Shotgun

Serial Number 2640

\$4500.00

DESCRIPTION

Winchester 12g Model 21 Double Barrel Hammerless Shotgun, serial number 2640, made in 1935.

Early version, standard model, non-ejector with two triggers, with first style semi-pistol grip and and splinter forend with the first style of forend latch. Original hard rubber butt plate and 14" LOP.

The 28" *Winchester Proof Steel* barrels have a flat matted rib and are choked Mod & Full.

Super high, original condition gun retaining nearly all of its original metal and wood finish, save for the few marks it has picked up in its nearly 90 years of history, this is a collector grade gun that shows the earliest variation of the 21's standard model and it would make a classic pre-WWII, American double barrel bird gun in virtually unused condition.
