

Parker Repro 12g Two Barrel Set  
Serial Number 00752  
**\$4750.00**

DESCRIPTION

Parker Reproductions 12g DHE Two Barrel Set

Based on a the original Parker "1 1/2" frame with DHE grade game scenes and scroll, automatic safety, and single selective trigger.

Original two barrel set includes a set of 26" barrels are marked "2" on the forend hook and "Imp. Cyl" and "Mod" on the barrel flats and are choked .007" in the right barrel and .010" in the left barrel. The 28" barrels are marked "1" on the forend hook and "Mod." and "Full" measure .010" in the right and .035" in the left barrel. Weighs 6 lbs. 11.1 oz. with the 26" bbls and 6 lbs. 13.0 oz. with the 28" barrels. Both sets of barrels have 2 3/4" chambers and the " *Winchester East Alton, IL USA* " import mark engraved in the middle of the top rib.

Original Parker Repro stock with a straight hand grip and a 14 5/8" LOP over the skeleton butt and Parker style drop points with the original splinter forend.

The gun is in its factory lightweight leather case that accommodates two barrels with the Maker's trade label.

Gun has definitely been hunted and shows quite a few handling marks and scratches the factory original stock finish. There is a little "chipping" around the edges of the stock and guard bow tang, but I do not see any cracks in the stock. The action shows only traces of case colors in protected areas with most of the metal worn bright from being carried and used. Barrels are in good shape with excellent bores, are tight on face, and the ejectors are timed and strong. A few marks on the 26" barrels, but no dents, bulges, or signs of repair in either set.

Overall, condition is good and the blemishes are only cosmetic.

The rebirth of the famous Parker shotguns came about in the early 1980's was the work of Tom Skeuse, founder of Regent Chemical & Research Inc. An avid Parker shooter/collector, Mr. Skeuse secured permission from Remington to use the Parker name and turned to Olin-Kodensha manufacturing in Japan to produce the guns. Olin-Kodensha was a 1962 joint venture between Olin Industries and Kodensha Co. Ltd. of Japan to manufacture the Winchester 101 O/U and Model 23 SxS shotguns. While the Winchester Repeating Arms division of Olin was never involved with the making of the Parker shotgun, the Parker Reproduction guns were originally imported under Winchester's import license and guns from this era bear that import mark on their barrels.

The company was short lived and stopped production when Olin-Kodensha was ceasing production of the Winchester 101 and 23 and the Parker project at the end of 1988. The original Parker Reproduction production records were lost in a hurricane in 1988, but the Skeuse family reports 12,225 Parker Reproduction guns were imported into the U.S. between 1983 and 1988 and only about 1,800 of them were ever made in 12g.

SPECIFICATION

Location	US
Make	Parker Bros.
Calibre/Gauge	12g
Action	Boxlock
Triggers	1
Ejectors	Yes
Barrel Length	26" & 28"
